DETAILED ACTION

1. Claims 1-19 are in the application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 4, and 10-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Tonokaboni et al.

Tonokaboni et al discloses a boat propeller shield including a cover having an interior cavity for receiving a propeller; a front opening 50; a slit 52 and a fastener which may include a zipper.

The cover has a circular shape with a convex front portion.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3, 6, 7, 15, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tonokaboni et al in view of Adams, Jr.

Adams Jr. discloses a cover similar to that of Tonokaboni et al and teaches providing the same with middle portion between the front and rear portion. In view of these disclosures, it would have been obvious to one skilled in the art to provide the cover of Tonokaboni et al with a

middle portion generally as taught by Adams, Jr. To make the cover from neoprene would have been an obvious matter of design choice as taught by Tonokaboni et al who teaches that the cover can be made from different materials. To make the front and rear cover substantially parallel would have been an obvious expedient to one skilled in the art. The provision of the middle portion would provide more room inside the cover making it easier to secure without the need for the convex configuration.

Allowable Subject Matter

6. Claims 8 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Argondizza and Carlisle are cited as showing other propeller cover configurations. Fago discloses a fan cover.
